SUMMARY

Computer Engineering student with hands-on experience in building web applications using React, Node.js, and databases. Actively participates in hackathons and team projects, with a strong focus on problem-solving, scalability, and clean UI/UX.

EDUCATION

Bachelor of Engineering – Computer Engineering (final Year) Duration: 2023 – 2027
Mumbai University, India

TECHNICAL SKILLS

- **Languages**: JavaScript, TypeScript, Python, Java, C, SQL
- **Frontend**: React.js, HTML, CSS, Tailwind CSS, Vite
- **Backend**: Node.js, Express.js, REST APIs
- **Databases:** MySQL, PostgreSQL
- **Design & Development:** Figma, UI/UX, Responsive Design
- **Tools:** Git, GitHub, VS Code, Antigravity

POSITIONS OF RESPONSIBILITY

Conference Coordinator & Creative Head – ICSICE 2026

- Coordinated the International Conference on Sustainability Innovation in Computing and Engineering (ICSICE 2026), overseeing cross-team planning, communication, and event execution. Directed the creative vision of the conference, including branding, visual design, promotional materials, and maintaining a consistent identity across conference activities.

Hackathon Club Head – Computer Engineering Department | 2024 – 2025

- Shaping technical challenges, facilitating team participation, and supporting students through ideation, development, and final submissions.

Technical Head – Department of Computer Engineering CESA & CSI | 2024

- Managed the department's technical activities, including student workshops, expert lectures, technical sessions, and project mentoring.

Projects

The Rkive | Founder & Developer | React.js, Node.js, Supabase, Cloudflare, Vercel

- Founded and developed a digital publishing platform for creating, managing, and showcasing college magazines, newsletters, and publications.
- Designed the brand identity, UI/UX, and end-to-end publishing workflow, with cloud-based storage and web deployment.
- Deployed and implemented the platform for real-world use at my college, supporting digital magazine publishing and content management.

Plant Leaf Multi-Disease Detection | Python, TensorFlow, Keras, MobileNetV2, CNN

- Developed a deep learning-based system to identify plant diseases from leaf images across multiple plant species.
- Implemented and evaluated a MobileNetV2 transfer learning model using the PlantVillage dataset, covering 25 disease classes and 31,397 images.
- Achieved 91.82% test accuracy and evaluated model performance using a confusion matrix, precision, recall, and F1-score.
- Conducted research-based implementation and experimental validation of a published approach to multi-class plant disease classification.

Escape Placement Cell | React.js, TypeScript, Node.js, Express.js

- Developed a gamified placement-preparation platform featuring interactive challenges and progression-based tasks.
- Built responsive frontend experiences using React.js and TypeScript with backend services using Node.js and Express.js.
- Designed user flows and interactive logic to make placement preparation more engaging and structured.

Certifications

- Introduction to Database Systems — NPTEL, IIT Madras | 2025
- RDBMS PostgreSQL Training — EduPyramids, SINE IIT Bombay | 2026
- Tata GenAI Powered Data Analytics Job Simulation — Forage | 2026
- Linux Training — EduPyramids, SINE IIT Bombay | 2025
